

Phase 1: One-Page Offer

Document type: customer-facing offer draft for qualified discovery prospects.

Status: draft. Founder, product, security, and counsel review required before public use.

Headline

Replace one fragile compliance readiness spreadsheet with a controlled No-CUI readiness workspace.

Who It Is For

FeDril is for small government contractors and subcontractors that need a practical way to organize readiness work across contract metadata, source-backed obligations, ownership, evidence metadata, reports, and audit history.

Best fit:

- Small federal prime or subcontractor.
- Preparing for CMMC-related readiness, contract review, flow-down review, or evidence organization.
- Currently using spreadsheets, email, shared drives, or informal tracking.
- Can complete the pilot with synthetic, redacted, or non-sensitive data only.

The Problem

Readiness work often fails because the tracker is not connected to the source requirement, evidence, owner, status, or report artifact. When a prime, customer, advisor, or internal leader asks for proof, the team has to rebuild the story manually.

The Pilot

30-Day Guided Readiness Pilot

FeDril will guide one No-CUI readiness workflow from setup to report artifact:

1. Confirm No-CUI pilot boundary.
2. Set up company profile and contract metadata.
3. Attach or review relevant clauses.
4. Generate and review source-backed obligations.
5. Assign owners and update workflow status.
6. Link allowed evidence metadata.
7. Generate a Compliance Status, CMMC Readiness, or Evidence Package artifact where applicable.
8. Review findings and decide whether to convert.

Price

\$750 flat pilot fee.

The pilot fee is credited toward the first annual subscription if the customer converts within the agreed period.

What Is Included

- Guided kickoff.

- One contract or synthetic readiness workflow.
- No-CUI data-handling boundary confirmation.
- Contract metadata and clause attachment/review.
- Source-backed obligation review.
- Owner and workflow status setup.
- Evidence metadata setup using allowed data.
- Report artifact generation.
- End-of-pilot findings session.

What Is Not Included

- Real CUI handling.
- Legal advice.
- CMMC certification.
- Assessor determinations.
- Government endorsement.
- Custom integrations.
- GovCloud, FedRAMP, SSO, SCIM, or enterprise procurement support.

Required Boundary

The current FeDril MVP is No-CUI / compliance management only. Do not upload, paste, import, attach, store, or process real CUI, classified information, ITAR/export-controlled data, credentials, payroll records, SSNs, health data, sensitive incident details, or other prohibited sensitive data.

Call To Action

Schedule a 30-minute fit call to confirm the workflow, internal owner, No-CUI boundary, and pilot decision process.
