

Sample Readiness Report

Document type: sales sample and pilot demo artifact.

Generated PDF: docs/marketing/sample-readiness-report.pdf.

Data status: synthetic demonstration data only.

Required boundary: this report is workflow guidance only. It is not legal advice, a CMMC certification decision, an assessor determination, a contracting-officer determination, or a government endorsement.

Report Summary

Field	Sample value
Customer	Acme Federal Services LLC
Tenant posture	No-CUI / compliance management only
Report date	2026-07-12
Workflow reviewed	DoD subcontract readiness workflow
Contract record	Synthetic Subcontract 2026-001
Report owner	Operations Lead
Review period	2026-06-12 to 2026-07-12

Executive Snapshot

Acme Federal Services LLC used FeDril to organize one synthetic subcontract workflow, identify source-backed obligations, assign readiness ownership, track allowed evidence metadata, and generate a readiness-oriented sample report.

This sample shows how FeDril can replace scattered spreadsheet tracking with a controlled compliance workspace. It does not evaluate legal compliance, certify CMMC compliance, determine official readiness, or authorize handling of real CUI.

Readiness Overview

Area	Status	Owner	Notes
Company profile	In progress	Operations Lead	Basic company metadata entered.
No-CUI acknowledgement	Acknowledged	Security Lead	No-CUI posture acknowledged for demo workflow.
Contract metadata	Complete	Contracts Lead	Synthetic subcontract record added.

Area	Status	Owner	Notes
Clause handling	In progress	Contracts Lead	Attached clauses, extraction candidates, or generated obligations require human review before pilot expansion.
Obligation ownership	In progress	Operations Lead	Owners assigned to 6 of 8 sample obligations.
Evidence metadata	Partial	Security Lead	Allowed sample evidence metadata attached to 4 obligations.
CMMC readiness tracking	Started	Security Lead	Workflow tracking only; no assessment determination.
Subcontractor flow-down tracking	Not started	Contracts Lead	Not applicable until subcontractor records are added.
Report generation	Complete	Operations Lead	Sample report generated from synthetic records.

Sample Obligation Matrix

Row 1

Obligation

Basic safeguarding practices

Source family

FAR safeguarding

Trigger

Covered contractor information present in contract workflow

Required action

Maintain documented basic safeguarding workflow

Owner

Security Lead

Evidence status

Metadata attached

Review state

Draft sample

Row 2

Obligation

Cyber incident handling record

Source family

DFARS cyber

Trigger

Contract includes cyber incident reporting requirement

Required action

Maintain internal reporting and escalation workflow

Owner

Security Lead

Evidence status

Gap identified

Review state

Draft sample

Row 3

Obligation

CMMC readiness task ownership

Source family

CMMC program workflow

Trigger

DoD supplier readiness review

Required action

Assign control-family owners and track evidence metadata

Owner

Security Lead

Evidence status

Partial

Review state

Draft sample

Row 4

Obligation

Subcontractor flow-down review

Source family

Flow-down workflow

Trigger

Subcontractor performs contract work

Required action

Determine whether flow-down tracking is needed

Owner

Contracts Lead

Evidence status

Not started

Review state

Draft sample

Row 5

Obligation

Evidence retention checkpoint

Source family

Internal readiness workflow

Trigger

Evidence used to support obligation tracking

Required action

Record evidence location, owner, date, and review status

Owner

Operations Lead

Evidence status

Metadata attached

Review state

Draft sample

Evidence Metadata Snapshot

FeDril tracks evidence metadata and allowed non-sensitive files for the No-CUI MVP. The sample does not include real customer CUI, classified information, ITAR/export-controlled technical data, credentials, payroll records, SSNs, health data, or sensitive incident details.

Type

Checklist

Sensitivity

Non-sensitive

Status

Attached

Row 4

Evidence item

Incident response contact list placeholder

Linked obligation

Cyber incident handling record

Type

Contact metadata

Sensitivity

Synthetic

Status

Gap requires review

Open Gaps

- Clause tagging requires final human review before being used for a real pilot workflow.
- Two sample obligations do not yet have named owners.
- Cyber incident handling evidence is represented by placeholder metadata only.
- Subcontractor flow-down tracking has not started because no subcontractor record was added.
- Readiness labels must not be interpreted as pass/fail or certification status.

Recommended Next Actions

1. Confirm the pilot workflow uses synthetic, redacted, or non-sensitive records only.
2. Assign owners for all obligations in the sample workflow.
3. Attach allowed evidence metadata for each high-priority obligation.
4. Review report language with the accountable compliance owner before sharing externally.
5. Schedule an end-of-pilot findings session to decide whether to convert to a paid subscription.

Required Disclaimer

This sample report is for demonstration and workflow-planning purposes only. FeDril does not provide legal advice, accounting advice, labor determinations, CMMC certification, assessor determinations, contracting-officer determinations, or government endorsement. The MVP is No-CUI / compliance management only. Real CUI and other prohibited sensitive data must not be uploaded, pasted, imported, attached, or processed in FeDril unless a future separately approved posture exists.
