

Phase 1: Positioning And Messaging

Document type: positioning guide for sales calls, website copy, and demo language.

Positioning Statement

FeDril is a No-CUI compliance readiness workspace for small government contractors that need to replace scattered spreadsheets with source-backed obligations, ownership, evidence metadata, current report artifacts, and audit history.

Short Version

FeDril helps small GovCon teams organize what applies, assign who owns it, track allowed evidence metadata, and generate readiness workflow artifacts without using the MVP as a CUI repository.

What FeDril Is

- A compliance management and readiness workflow tool.
- A No-CUI MVP workspace.
- A way to organize contract metadata, attached clauses, source-backed obligations, evidence metadata, reports, and audit history.
- A tool for internal readiness discipline and pilot discovery.

What FeDril Is Not

- Not a CMMC certification tool.
- Not legal, accounting, labor, or contracting advice.
- Not a government-endorsed system.
- Not a CUI repository in the MVP.
- Not a replacement for a C3PAO, assessor, attorney, CPA, consultant, or contracting officer.

Message Pillars

Pillar	Message	Proof path
Clarity	See what applies and why.	Obligations tab -> source, trigger, required action.
Ownership	Assign work to people or roles.	Obligations tab -> Assign by.
Evidence discipline	Track allowed evidence metadata without storing prohibited content.	Evidence tab -> metadata fields and No-CUI acknowledgement.
Reporting	Generate current workflow artifacts from structured data.	Reports tab.
Auditability	Trace compliance-relevant changes.	Settings tab -> Audit log.

One-Sentence Demo Opening

"This is a synthetic No-CUI demo showing how FeDril turns one contract readiness workflow into source-backed obligations, ownership, evidence metadata, report artifacts, and audit history."

One-Sentence Demo Close

"The next step is a paid 30-day guided pilot using one contract or synthetic workflow, No-CUI data only, with a clear conversion decision at the end."
