

Phase 1: Offer Validation Checklist

Document type: internal checklist before moving from discovery to Phase 2 sales assets.

Product Claim Validation

Check	Required answer
Does the offer claim only implemented or clearly demo-supported workflows?	Yes
Are current tabs named accurately?	Yes
Are all No-CUI boundaries stated?	Yes
Are reports described as workflow guidance only?	Yes
Are certification, legal, accounting, labor, and government-determination claims excluded?	Yes

Current App Tab Checks

Workflow	App location
No-CUI acknowledgement	Contracts and Evidence
Contract metadata	Contracts
Clause attachment	Contracts -> Attached clauses
Clause search helper	Obligations -> Clause library search
Obligation work queue	Obligations
Owner assignment and status	Obligations -> View details
Evidence metadata	Evidence -> Evidence metadata
Reports	Reports
Audit log	Settings

Offer Readiness

- ICP is specific.
- Poor-fit prospects are clearly identified.
- Pilot is paid by default.
- Pilot scope can be delivered without custom engineering.
- Pilot data can remain synthetic, redacted, or non-sensitive.
- Conversion credit is clear.
- Stop conditions are documented.
- Counsel review is identified before public use.

Hidden Risks

- The buyer may equate readiness with certification.
- The customer may try to upload prohibited data.

- The pilot may expand into unpaid consulting if scope is not enforced.
- The sales deck may drift from current implementation if not checked against the app.
- Pricing may need revision after the first three to five discovery calls.
