

Phase 1: Qualification Scorecard

Document type: prospect scoring tool.

Use this before offering a full demo or pilot.

Scorecard

Score each item from 0 to 2.

Criterion	0	1	2
Specific workflow	Vague compliance interest	General workflow named	Specific contract, CMMC, evidence, or flow-down workflow named
Spreadsheet pain	No current tracker	Tracker exists but pain unclear	Spreadsheet/email/shared-drive pain is explicit
Buyer urgency	No timing pressure	Useful someday	Active request, review, prime/customer pressure, or internal deadline
Internal owner	No owner	Possible owner	Named owner with availability
No-CUI fit	Requires real CUI	Unclear data boundary	Can use synthetic, redacted, or non-sensitive data only
Evidence metadata fit	No evidence workflow	Evidence exists but not urgent	Evidence exists and is hard to connect to obligations
Willingness to pay	Wants free help	Budget unclear	Accepts paid pilot or has buying path
Conversion potential	No subscription path	Possible future path	Clear post-pilot conversion decision

Decision Rules

Score	Decision
13-16	Strong fit. Offer pilot scope review.
9-12	Conditional fit. Continue discovery or run limited demo.
5-8	Weak fit. Do not offer a paid pilot yet.
0-4	Disqualify or redirect.

Hard Disqualifiers

Disqualify even if the score is high when the prospect:

- Requires real CUI handling in the MVP.
- Requires FeDril to certify compliance.
- Requires legal, accounting, labor, contracting, government, or assessor determinations.
- Cannot identify a pilot owner.
- Requires custom integrations before any value can be proven.
